

Information

This document provides you investor information about the Piquin Com strategy. This strategy is provided by Van Sterling Capital Limited, licensed by the Malta Financial Services Authority (the “MFSA”) as an asset manager. The Piquin Com strategy is not a “packaged retail and insurance-based investment product” or “PRIIP” as defined in terms of Packaged Retail and Insurance-based Investment Products Regulation (“PRIIPs Regulation”) but merely an investment strategy according to the specifications of a Trading Mentor, which is implemented in your account by Van Sterling. Accordingly, this document is not a key information document and should not be regarded as

such and is only a general description of the investment strategy in question, together with a summary of the main risks and other relevant information. This document does not constitute an offer, solicitation or advice to invest into this strategy and shouldn’t be seen as providing a complete description of the strategy and the risks involved in investing in this strategy. In this respect, investors should refer to the information about the strategy they will get from Van Sterling Capital Limited and they should also consult their financial advisors or / and tax advisors.

Objectives and Strategy

The strategy focuses on investments in equities in the commodities sectors (copper, tungsten, uranium, gold, mines, etc.). The portfolio is actively managed, i.e. the weighting of the individual asset classes is flexibly adjusted to the respective capital market situation in order to seize opportunities and reduce volatilities. The aim of the portfolio is to achieve a higher return with increased risks.

Investors must be prepared to accept (even substantial) losses.

Warning

WHILST USING THEIR BEST ENDEAVOURS TO ATTAIN THESE INVESTMENT OBJECTIVES, THE TRADING MENTORS, DIRECTORS AND THE INVESTMENT MANAGER CANNOT GUARANTEE THE EXTENT TO WHICH THESE OBJECTIVES WILL BE ACHIEVED.

This strategy is maybe not suitable for investors who want to withdraw their invested capital from the strategy within a period of less than 5 years.

Risk Management

Each position is continuously monitored. The strategy is continuously adjusted to changing market conditions, while the key risk parameters remain unchanged.

Good to know

Despite our recommendation to stay with one strategy for at least 5 years, you can access your capital as well as initiate withdrawals whenever you want or need to.

Risk and Return Profile

← typical lower returns and lower risks typical higher returns and higher risks →

This risk indicator is based on historical data. A clear prediction for future developments is therefore not possible. The classification of the Managed Account may change in future. Even a Managed Account that is classified in Category 1 cannot be considered as an investment without risks.

The Piquin Com strategy is classified in category 6. The preservation of assets is important to the investor. The investor is prepared to take limited risks and tolerates small to moderate fluctuations and losses.

Special Risks in Trading Commodities (and the instrument used. E.g. futures, options, ETF, stocks, etc.)

1) Entrepreneurial development

The shareholder does not act as a creditor vis-à-vis the company, but rather as a co-owner of the stock corporation with his shares forming part of the equity capital and thus directly participating in the economic development of the company. The investor is a de facto entrepreneur who can be confronted with both opportunities and risks in the form of price gains or losses. The shareholder's risk is that the economic situation of the stock corporation may develop differently than originally assumed. Corporate developments are difficult to predict. As a so-called worst case scenario, insolvency proceedings mean the total loss of the capital invested, the share becomes worthless. In the event of insolvency of a stock corporation, the shareholder is not entitled to liquidation proceeds until all creditors' claims have been satisfied.

2) Risk of price fluctuation

The two different risk factors, general market risk and company-specific risk, can influence the price of the acquired share.

The stock market is influenced by the economic environment such as the uncertainty of economic growth, inflation, interest rates, foreign exchange rates and economic data. These movements are referred to as market risk, which affects the price of the shares impact. Some companies are more exposed to market risk than others. The company-specific risk is that human error in the management of the companies will cause them to react incorrectly or completely wrongly to changing currents in the market. In the long term, therefore, price changes are dependent on the earnings situation of the respective company. In the short to medium term, however, rising and falling share prices alternate and cannot be predicted. These fluctuations are described as volatility. They can be measured for the past: The higher the price fluctuations the higher is also the volatility.

3) Foreign exchange risks

In the case of shares not quoted in euros, investors are exposed to exchange rate risk. A share quoted in U.S. dollars therefore involves not only market and price risks but also the exchange rate risk of the U.S. dollar itself. If the exchange rate of the U.S. dollar is weaker when the share is sold than when it was purchased, these price reductions also affect the share.

4) Specific market risk

In addition to general market risk, specific market risks also influence performance. With a commodity investment, you decide to invest in a specific market. If changes occur due to special, individual changes affecting this market, such a new development will affect these shares. Special or individual market risks can be: negative development/news at a significant market participant, change of management, change of special laws or general conditions.

Disclaimer

This document does not constitute an offer to invest in or a solicitation of an offer of this strategy in any jurisdiction in which an offer or solicitation is not authorized or to any person to whom it is unlawful to make such offer or solicitation and is for information purposes only. Subscriptions will only be received and agreements signed on the basis of the current descriptions and agreements and prospective investors should carefully consider the risk warnings and disclosures for this strategy set out therein.

THE VALUE OF THE INVESTMENT MAY GO DOWN AS WELL AS UP AND INVESTORS MAY GET BACK LESS CASH THAN ORIGINALLY INVESTED. PAST PERFORMANCE IS NOT NECESSARILY A GUIDE TO FUTURE PERFORMANCE. An investment in the strategy is not the same as a deposit with a banking institution. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Dividends, capital gains, interest and any other income from the trading strategy may be subject to tax and / or stamp duties at such rates applicable from time to time and shall be borne by the investor.

The performance calculation in this factsheet shows how an investment in the strategy would have developed monthly. The statistics are based on the total return minus all fees incl. VAT.

This document in whole or in part may not be reproduced without the express written permission of the manager. A full description of the investment terms and strategy (and related risk factors) can be given by the manager.
